

## Mark Hibbs

### Nonresident Senior Fellow, Carnegie Endowment for International Peace

Mark Hibbs is a nonresident senior fellow with the Carnegie Endowment for International Peace's Nuclear Policy Program and is based in Berlin and Bonn, Germany. Before joining Carnegie in 2010 he was an editor and correspondent in the field of nuclear energy, nuclear trade, and nonproliferation.

Hibbs' research is focused broadly on international nuclear trade and nonproliferation governance in four main areas: the international nuclear trade regime, decision-making at the International Atomic Energy Agency, nuclear safeguards and verification, and bilateral nuclear cooperation arrangements.

Hibbs has chaired two workshops for all participating governments of the Nuclear Suppliers Group, the world's leading multilateral nuclear trade control mechanism. He also authored a Carnegie report, *The Future of the Nuclear Suppliers Group*, published in 2011.

Hibbs also works on policy concerning the generation of nuclear power. In 2018 Hibbs published the report from this project as a book: *The Future of Nuclear Power in China*. Since 2012, Hibbs has led a project at Carnegie concerning the future of China's nuclear energy program, its nuclear fuel cycle, and spent fuel management policies.

His work has appeared in outlets including the *New York Times*, *Financial Times*, *Washington Post*, and other media. He has also been a frequent contributor to the *Arms Control Wonk* blog.

*Mr. Hibbs has not testified before the Commission.*
