

Dakota Cary

Research Analyst, Georgetown's Center for Security and Emerging Technology (CSET)

Dakota Cary is a Research Analyst at Georgetown's Center for Security and Emerging Technology (CSET), where he works on the CyberAI Project. Cary focuses his research on China's efforts to develop its hacking capabilities. Cary's reports examine AI and cybersecurity research at Chinese universities, PLA efforts to automate software vulnerability discovery, and new policies to improve China's cybersecurity talent pipeline. He holds an MA from Georgetown's Security Studies program with a concentration in technology and national security, and also completed a certificate in Asian Studies. Prior to beginning his master's program, Cary worked in North Carolina politics. Relevant publications include *China's CyberAI Talent Pipeline* (2021), *China's National Cybersecurity Center* (2021), and *Academics, AIs, and APTs* (2021).

Mr. Cary has not previously testified before the Commission.
