

## **Yanzhong Huang**

**Professor and Director of the Center for Global Health Studies, Seton Hall University  
School of Diplomacy and International Relations**

Yanzhong Huang is a senior fellow for global health at the Council on Foreign Relations, where he directs the project on global health security. He is also a Professor at Seton Hall University's School of Diplomacy and International Relations, where he developed the first academic concentration among U.S. professional schools of international affairs that explicitly addresses the security and foreign policy aspects of global health issues. He has written extensively on China and global health. He has published numerous reports, journal articles, and book chapters, including articles in *Survival*, *Foreign Affairs*, *New York Times*, *Foreign Policy*, and *Washington Post*. In 2006, he coauthored the first scholarly article that systematically examined China's soft power. He is the author of *Governing Health in Contemporary China* (2013), *Toxic Politics: China's Environmental Health Crisis and its Challenge to the Chinese State* (2020), and *The COVID-19 Pandemic and China's Global Health Leadership* (2022).

He is regularly consulted by major media outlets, the private sector, and governmental and nongovernmental organizations on global health issues and China. He serves on the expert board of CSIS Commission on Strengthening American Health Security and cochairs the commission's China working group. In 2012, he was listed by *InsideJersey* magazine as one of the "20 Brainiest People in New Jersey." He was a research associate at the National Asia Research Program, a public intellectuals fellow at the National Committee on U.S.-China Relations, and a visiting fellow at the Center for Strategic and International Studies. He has taught at Barnard College and Columbia University. He obtained his B.A. and M.A. degrees in international politics from Fudan University and his Ph.D. degree in political science from the University of Chicago.

*Dr. Huang last testified at the Commission's 2019 Hearing "Exploring the Growing U.S. Reliance on China's Biotech and Pharmaceutical Products."*
