

## **Nigel Cory, Crowell Global Advisors**

Nigel Cory is a director with Crowell Global Advisors focusing on cross-border data flows and data governance, new and emerging technologies like cloud, quantum computing, and artificial intelligence, international technology governance, international technical standards, and how all these issues relate to digital trade, innovation, competitiveness, and the broader digital economy. Nigel has provided in-person testimony and written submissions and has published reports and op-eds relating to these issues in the United States, the European Union, Australia, China, India, and New Zealand, among other countries and regions, and he has completed research projects for international bodies such as the Asia Pacific Economic Cooperation and the World Trade Organization. Nigel was a member of the United Kingdom’s International Data Transfer Expert Council and is a member of the Organization for Economic Cooperation and Development (OECD)’s Data Free Flow with Trust Expert Community. Cory is a Nonresident Fellow at the National Bureau of Asian Research (NBR). Cory previously covered trade and digital policy at the Information Technology and Innovation Foundation (ITIF). Prior to that, he worked for eight years in Australia’s Department of Foreign Affairs and Trade.

*Mr. Cory has previously testified before the Commission in the 2021 hearing on “A Net Assessment of the Chinese Communist Party’s Economic Ambitions, Plans, and Metrics of Future Success.”*
