

David D. Chen

Independent Analyst

Mr. Chen is an independent analyst focusing on the intersection of space and cyber-security issues. He is a fluent Chinese-language analyst, specializing in open source scientific and technical literature. He regularly contributes to research projects and other products for various government and private clients. He is a published author in multiple national and international journals. He also serves on the Editorial Board of the internationally peer-reviewed journal *Space Policy*.

Mr. Chen graduated from the School of Global Policy and Strategy, UC San Diego, where he studied under Dr. Susan Shirk. He has also worked at the nonprofit Center for Defense Information under a Secure World Foundation grant; and the environmental think tank Resources for the Future under the mentorship of the late Dr. Molly Macauley, in the Space Economics program.

Mr. Chen has not previously testified before the Commission.
