

As vice president of composites market development at the American Composites Manufacturers Association (ACMA), Dan Coughlin works to establish global markets for U.S. composites manufacturers, particularly in materials for aerospace and automotive manufacturing. Prior to joining ACMA, Mr. Coughlin was director of open innovation at ITECS-Innovative Consulting, a technology-focused consulting firm that helps research intensive startups commercialize promising technology. Before focusing on market growth and innovation, Mr. Coughlin was a research engineer, first at General Electric, and later at Sappi, a European developer of wood fiber composite materials. He holds a B.S. and M.S. in Chemical Engineering from the University of Maine.

*Mr. Coughlin has not previously testified before the Commission.*
